

Skylight Shade Measuring Guide

Use this handy guide to keep track of your skylight measurements.
For window measurements, download the window measuring guide from our website!

To ensure a proper fit, make sure you measure the **diagonal measurements** (top right corner to bottom left corner and top left corner to bottom right corner). If those measurements differ by more than ¼" you will need to shim your skylight opening to accommodate the shade and retainer track.

- **Width:** Measure the exact inside measurement of the window at **the Top, Middle and Bottom**. Write the measurements down below. Circle the narrowest width measurement
- **Length:** Measure the exact inside distance from top of window to the sill at **the Left, Middle and Right**. Write the measurement down below. Circle the shortest length measurement.

Room:		Color:		Window Number:	
Measurement	Measure #1	Measure #2	Measure #3	Diagonal Measurements	
Width (Inches): Circle Narrowest				Top Left to Bottom Right Measurement:	Top Right to Bottom Left Measurement:
Length (Inches): Circle Shortest
